Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 14-16 is rejected under 35 U.S.C. 102(b) as being anticipated by Kandlur et al (Patent No. US 5,742,347)

Regarding claim 14, 15, Kandlur et al (hereinafter Kandlur) anticipates an encoder comprising: a determining unit configured to receive a first picture type, said first picture type used to set a bit rate corresponding to the size information of a second picture type (see figure 5 element 508); and an encoding unit for converting the first picture type into the second picture type using the set bit rate (see figure 5 element 508 and column 5 line 13-23).

Regarding claim 16, Kandlur anticipates an encoder for performing the method of claim 15, further comprising: a determining unit configured to receive the first picture type to set the bit rate corresponding to the size information of the second picture type

(see figure5 element 508 and column5 line 13-23); and an encoding unit configured to convert the first picture type into the second picture type using the set bit rate (see figure5 element 508 and column5 line 13-23).

Allowable Subject Matter

Claim1-13 and 17-22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The present invention directed to an apparatus for controlling a bit rate during reverse play of a digital video stream. The independent claims identify uniquely distinct feature "...determining a bit rate using size information from an intra-coded picture of a first subgroup of pictures in the group of pictures received from the sorting unit, and setting bit rates of next subgroups of pictures using the determined bit rate" The closest prior art Kandlur et al (Patent Number US 5,742,347) either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.
